Technology that supports progress.

Company profile | ICT Standard Solution

Who we are

ICT Standard Solution helps homes, businesses and public institutions plan, implement and support practical technology. Our work brings together consultancy, connectivity, software, equipment and training to address real operational needs.

Our approach

We begin with your requirements, agree a clear scope, implement and test the solution, then provide handover and an agreed support arrangement. Timelines, licences, costs and ongoing responsibilities are confirmed in the accepted proposal.

Leadership

Nasir Danjuma - Founder & Chief Executive Officer
A Computer Science professional with 15 years of ICT experience, combining technical expertise, strategic planning, team leadership and practical problem-solving.

ICT consultancy

Technology assessments, ICT strategy, requirements definition, procurement guidance and implementation planning.

Networking and internet

Network design, structured cabling, Wi-Fi, internet requirements, installation, configuration and handover for homes, offices and institutions.

Cybersecurity

Practical security reviews, access controls, endpoint and firewall improvements, backup planning and staff awareness.

Software and mobile applications

Web platforms, mobile applications and database solutions developed around agreed business workflows and reporting needs.

Connected services. Clear delivery.

Capabilities, support and contact

E-governance

Digital records, approval workflows, service portals and management reporting for public-sector requirements.

E-hospital and e-school

Hospital information workflows and school administration systems planned around approved processes, access responsibilities, testing and training. Production readiness and any specialist compliance reviews must be agreed with the institution.

Equipment supply and installation

Computers, servers, networking equipment and related ICT products matched to approved specifications, with installation and handover within the quotation.

Digital training and technical support

Practical staff training, project aftercare, preventive maintenance and ad hoc assistance. Support coverage, visits, response commitments and recurring charges are agreed separately.

How we work

01 DISCOVER	02 PLAN	03 IMPLEMENT	04 SUPPORT
Understand your needs	Agree scope and costs	Deliver, test and train	Hand over and improve
